ELSEVIER

Mechanisms of Development 79 (1998) 227

Volume contents

Volume 79 (1998)

Issue contents 1

Announcement 3

J. Joore, S. van de Water, M. Betist, A. van den Eijnden-van Raaij, D. Zivkovic (The Netherlands)
Protein kinase A is involved in the induction of early mesodermal marker genes by activin 5

E. Weisberg, G.E. Winnier, X. Chen, C.L. Farnsworth, B.L.H. Hogan, M. Whitman (USA)
A mouse homologue of FAST-1 transduces TGFβ superfamily signals and is expressed during early embryogenesis 17

T. King, R.S.P. Beddington, N.A. Brown (UK)
The role of the *brachyury* gene in heart development and left–right specification in the mouse 29

J.C. Rusconi, V. Corbin (USA)
Evidence for a novel Notch pathway required for muscle precursor selection in *Drosophila* 39

D.D. Till, B. Linz, J.E. Seago, S.J. Elgar, P.E. Marujo, M. de Lourdes Elias, C.M. Arraiano, J.A. McClellan, J.E.G. McCarthy, S.F. Newbury (UK, Portugal)
Identification and developmental expression of a 5′–3′ exoribonuclease from *Drosophila melanogaster* 51

G.P. Holmes, K. Negus, L. Burridge, S. Raman, E. Algar, T. Yamada, M.H. Little (Australia)
Distinct but overlapping expression patterns of two vertebrate *slit* homologs implies functional roles in CNS development and organogenesis 57

T. Yarnitzky, L. Min, T. Volk (Israel)
An interplay between two EGF-receptor ligands, Vein and Spitz, is required for the formation of a subset of muscle precursors in *Drosophila* 73

B. Fuß, M. Hoch (Germany)
Drosophila endoderm development requires a novel homeobox gene which is a target of Wingless and Dpp signalling 83

H. Grandel, S. Schulte-Merker (Germany)
The development of the paired fins in the Zebrafish (*Danio rerio*) 99

M.C. Caldwell, S. Datta (USA)
Expression of *Cyclin E* or *DP/E2F* rescues the G1 arrest of *trol* mutant neuroblasts in the *Drosophila* larval central nervous system 121

M. Mariani, A. Corradi, D. Baldessari, N. Malgaretti, O. Pozzoli, R. Fesce, S. Martinez, E. Boncinelli, G.G. Consalez (Italy, Spain)
Mab21, the mouse homolog of a *C. elegans* cell-fate specification gene, participates in cerebellar, midbrain and eye development 131

R. David, T.O. Joos, C. Dreyer (Germany)
Anteroposterior patterning and organogenesis of *Xenopus laevis* require a correct dose of germ cell nuclear factor (xGCNF) 137

L.-I. Larsson, L. St-Onge, D.M. Hougaard, B. Sosa-Pineda, P. Gruss (Denmark, Germany, USA)
Pax 4 and 6 regulate gastrointestinal endocrine cell development 153

R.P. Kühnlein, C.-K. Chen, R. Schuh (Germany)
A transcription unit at the *ken and barbie* gene locus encodes a novel *Drosophila* zinc finger protein 161

N.E. Paradies, L.P. Sanford, T. Doetschman, R.A. Friedman (USA)
Developmental expression of the TGFβs in the mouse cochlea 165

A.W. Moore, A. Schedl, L. McInnes, M. Doyle, J. Hecksher-Sorensen, N.D. Hastie (UK, Germany, Austria)
YAC transgenic analysis reveals *Wilms' Tumour 1* gene activity in the proliferating coelomic epithelium, developing diaphragm and limb 169

Y. Renoncourt, P. Carroll, P. Filippi, V. Arce, S. Alonso (France)
Neurons derived in vitro from ES cells express homeoproteins characteristic of motoneurons and interneurons 185
Gene expression patterns

Y. Ye, M.E. Fortini (USA)
Characterization of *Drosophila* Presenilin and its colocalization with Notch during development 199

J. Bundy, R. Rogers, S. Hoffman, S.J. Conway (USA)
Segmental expression of aggrecan in the non-segmented perinotochordal sheath underlies normal segmentation of the vertebral column 213
